DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 March 2006 has been entered. Claims 6-12 are new and pending in the application. Claims 1-5 have been canceled.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Malmquist (US 2,608,459).

Claims 6 and 11: Malmquist discloses a fishing tackle utility box (see Figure 1) with a housing **B**, at least one central cavity (area bounded by the top, bottom, and

Art Unit: 3728

sidewalls of **B**) formed on the side of the housing, and a cover **C**. Malmquist anticipates (see Col. 2, lines 29-31) the cavity as partitioned to accommodate a plurality of trays **15**. Accordingly, the partitions form a plurality of compartments and the trays **15** are located in the compartments.

Claim 7: The compartments of Malmquist are configured for direct access once the cover **C** is removed (see Figure 1).

Claim 8: The trays **15** of Malmquist open in a plane perpendicular to the access point.

Claims 9 and 10: The trays **15** have a front face as claimed (see Figure 1) and function as claimed.

Claim 12: The bottom of Malmquist is flat to rest flat on a stationary surface.

Response to Arguments

4. Applicant's arguments with respect to claims 6-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Anderson and Bunten disclose side-opening drawers/trays. Maraman discloses side-opening compartments.
